Introducing the Visionary Wellness & Imaging Corporate Program

Visionary helps employees take a proactive approach to their health through discounted preventive imaging designed to detect heart disease, lung disease, cancer, and other silent health risks before symptoms appear.

Companies including American Airlines, Provident Realty, Blackland Partners, Novusag, and Weathershield Roofing are already participating. Whether your organization has 10 employees or 10,000, this program can work for your team.

Today's workforce is focused on wellness, prevention, and longevity. Visionary provides advanced imaging, radiologist-reviewed results, and a simple scheduling process that helps employees better understand their health and potential risks.

Best of all, there is no requirement for your company to contribute financially. Employees receive exclusive corporate pricing, while Visionary handles the education, coordination, and scheduling. Conveniently located in Irving near Highway 161, with easy access from DFW Airport and Love Field.

Visionary Wellness & Imaging—helping employees live healthier, longer lives through early detection and prevention.

John E. Shero

John E. Shero is a highly accomplished healthcare professional and the CEO of Visionary Wellness and Imaging. With a background as a CPA, Podiatrist, and Health-Coach. With over 30 years of healthcare experience, including a decade as the CEO of an emergency room group, John possesses a unique blend of financial acumen and healthcare expertise.

In addition to his leadership at Visionary Wellness & Imaging, John serves as the Chair for the American Lung Association's Air Climb in Dallas and is actively engaged with the American Heart Association, demonstrating his commitment to advancing prevention in healthcare.

Dr. Jeffrey Markham

Dr. Jeffrey Markham received his undergraduate degree at Brigham Young University. He received his MD from Eastern Virginia Medical School in 2005. He completed his internship and Diagnostic Radiology residency at the University of Texas Southwestern in Dallas, TX, where he served as chief resident from 2008-2009. He also completed a Neuroradiology fellowship at UT Southwestern. He has been in full-time teleradiology practice since 2011.

Our Facility

Our Technology

GE RevMaxima 128

GE's Revolution Maxima is a new standard computed tomography, powered by artificial intelligence technology that delivers a streamlined line workflow for better ease of use and operational efficiency.

For better clinical performance, Revolution Maxima has Clarity Imaging Chain consists of Clarity Detector, DAS, Performix™40 Plus X-ray Tube and ASiR-V™ (Option) / ASiR™ reconstruction and delivers high resolution imaging to meet various customer needs in real clinical situations. 40 mm Detector 64 channel/128 slice, Auto Positioning camera (AI) to assist technologist in positioning, Ca Scoring package on the console.

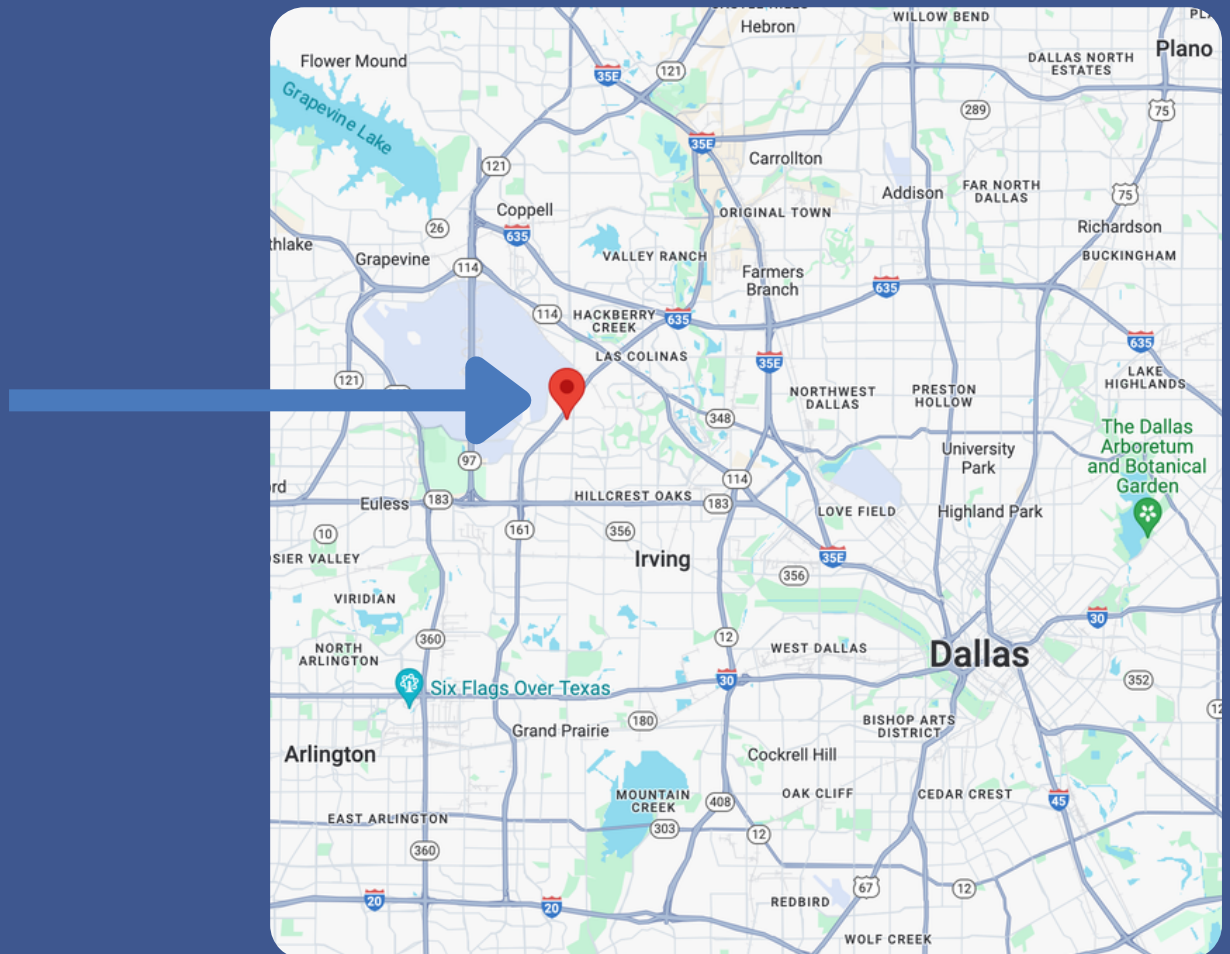

Clarity Imaging Chain delivers higher spatial resolution, lower noise, or less-artifact.

Our Location

3575 Story Rd. W Suite 130,
Irving, TX 75038

In the heart of DFW, Visionary Wellness & Imaging is conveniently located off President George Bush Turnpike and Story Rd. Our state of the art facility is only 9 minutes from the Dallas-Fort Worth International Airport.

CT Scan Details:

Full Body Scan

Heart: Coronary Artery Disease Screening, Pericardium Assessment, Heart Size Assessment, Heart Valve Calcification (Calcium Score)

Lungs: Lung Cancer, Emphysema, Tuberculosis, Esophagus

Abdomen: Hiatal Hernia, Thoracic Aneurysm, Abdominal Aortic Aneurysm, Internal Organ Screening, Stomach, Liver, Pancreas, Spleen, Gallbladder, Kidneys, Bladder, Adrenal Glands, Uterus/Ovaries, Prostate

Virtual Colonoscopy

Less invasive than a traditional colonoscopy, a virtual colonoscopy uses low-dose CT imaging to produce a multidimensional image of the colon, which is then examined by a radiologist to screen for colon cancer, obstructions, and other diseases. The scan typically takes 10 minutes, requires no anesthesia, and poses less risk of accidental harm to the large intestine, while providing a detailed and sensitive image. It can see the outside of the colon as well as the inside.

Carotid Artery Ultrasound

A scan of the carotid arteries as well as the internal and external arteries. This scan checks for blood flow and plaque build up that can lead to stroke.

Thyroid Ultrasound

A scan of the thyroid gland that checks for any abnormalities such as an enlarged gland and nodules.

Breast Ultrasound

Our state-of-the-art breast ultrasound uses advanced imaging technology to provide a detailed, non-invasive examination of your breast tissue. This safe and painless procedure helps detect early signs of abnormalities.

Each client receives their results in 24-48 hours, as well as a phone consultation to review their results.

Retail Pricing:

Heart Scan: \$135.00

Heart & Lung Scan: \$385.00

Full Body Scan: \$1,250.00

Virtual Colonoscopy: \$1,250.00

Full Body Scan & Virtual Colonoscopy: \$1,900.00

Ultrasound Scan for Carotid: \$249.00

Ultrasound Scan for Thyroid: \$249.00

Breast Ultrasound: \$295.00

DVT Ultrasound: \$249.00

Corporate Pricing:

Heart Scan: \$99.00

Heart & Lung Scan: \$249.00

Full Body Scan: \$750.00

Corporate Accounts will receive priority scheduling, including the option of dedicated days.

What Corporate Partners Are Saying ”

NovusAg partnered with Visionary Wellness & Imaging to provide preventative CT scans and ultrasound screenings for our management team. The experience was exceptional. The staff was professional and knowledgeable, the process was efficient, and the facility was impressive.

Most importantly, the screenings identified several significant findings that might otherwise have gone undiscovered. We are very appreciative of the opportunity to provide this proactive health resource to our team and value the important role Visionary played in helping our employees gain meaningful health information and peace of mind.

- Tommy Warner, NovusAg

Our company has used Visionary Wellness & Imaging for preventative CT scans and ultrasound screenings for multiple years. Each experience has been professional, well-organized and efficient. The Visionary team makes the process simple, the facility is excellent, and the staff consistently provides a high level of care and service. Over the years, the screenings have provided valuable health insight for our team, including findings that warranted follow-up. We are grateful to have access to this level of preventative screening and believe Visionary offers a meaningful resource for employees who want to proactively manage their health.

- Leon Backes, Provident Realty

Visionary Wellness & Imaging made it simple for us to offer employees access to advanced preventative scans. The program provided valuable peace of mind, helped promote early detection, and was handled professionally from start to finish. It is a meaningful benefit we are proud to offer our team.

- Chase Beauregard, Blackland Partners

Our Mitten's family recently traveled from Kansas to Texas to provide preventative health screenings for 10 employees through Visionary Wellness & Imaging. The experience was professional, organized, and accommodating from start to finish. Our team received individualized evaluations and imaging services, including full-body CT scans, carotid artery scans, thyroid scans, and breast ultrasounds. The screenings provided valuable health information and reinforced the importance of being proactive about long-term wellness. After recently losing a beloved team member at just 35 years old, this investment in preventative care felt especially meaningful. We are grateful for the care our employees received and would recommend Visionary Wellness & Imaging to any organization looking to support the health and well-being of its workforce.

- Misty Mildenberger, Mittens

WeatherShield Roofing utilized Visionary Wellness & Imaging to provide preventative CT scans and ultrasound screenings for our employees. The process was straightforward, well-organized, and easy for our team to participate in. The screenings provided useful health information for several employees. Offering access to preventative screening has been a valuable addition to our employee wellness efforts and gives team members an opportunity to be more proactive about their health.

We appreciate the Visionary team's convenience and professionalism and would recommend their services to other companies interested in expanding their wellness benefits.

- Garrett Becker, Weathershield Roofing
